All the screens associated with the seller UX, create offers, dashboard with analytics, messages, orders, notifications, settings etc

Screens to be Modified :

As we discussed in the meeting. There are around a total of 15 - 20 features that need to be removed / added.

User Experience

These screens will be interlinked to each other in the best manners possible for providing the maximum user engagement. Total Screens to be made entirely : 21 Screens

The screens written are the minimum possible number of screens for each of the views. However, the + means that they may exceed in number as any other feature needs to be added at that time but most probably , we will try to make them the same number.
